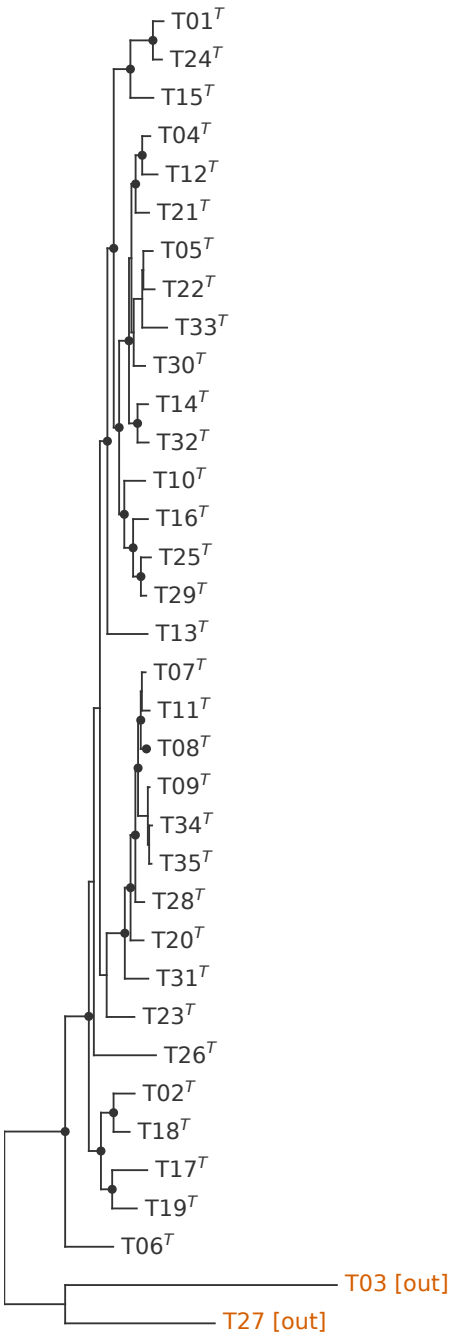
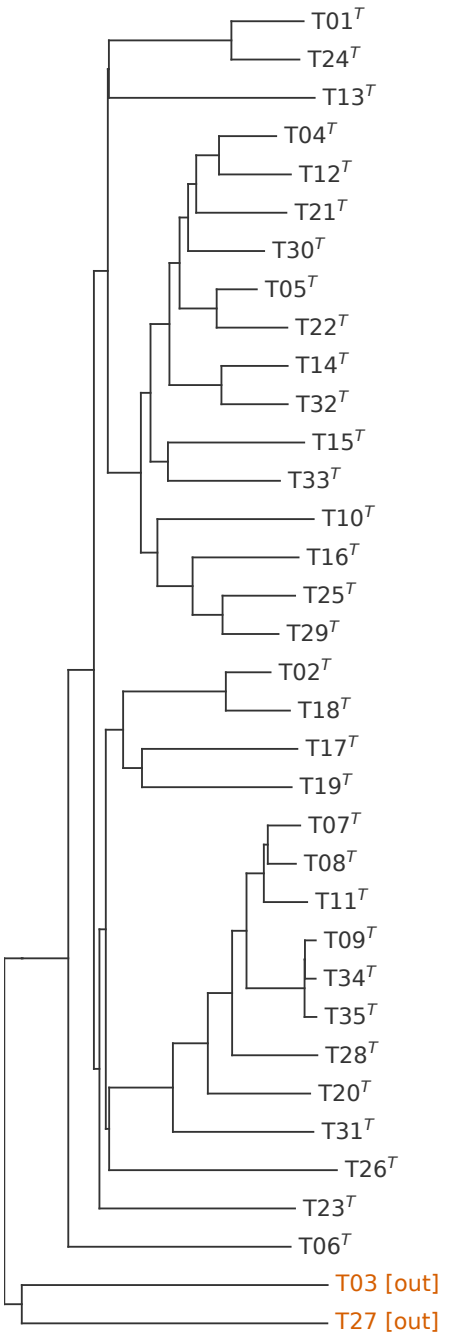
Type-strain phylogenies oriented on the shared outgroup edge
Dots: source local support or sketch frequency ≥0.95

(a) BAC120 / FastTree
SH-like local support



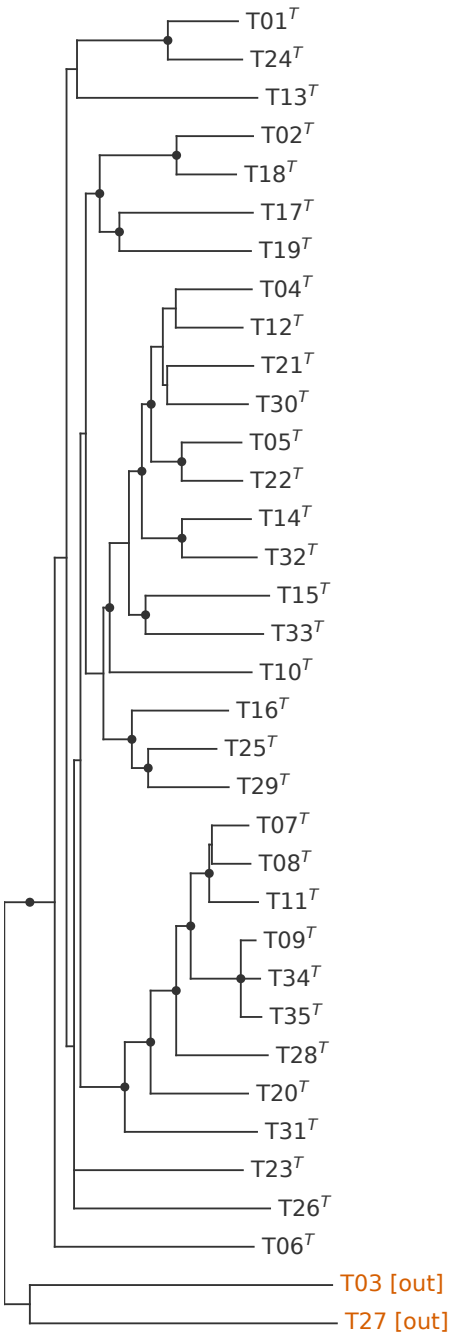
0.017 source distance units

(b) Verticall / FastME
No branch-support estimates



0.021 source distance units

(c) Mashtree consensus
Sketch-seed frequency



0.020 source distance units
